

****Notice that uploading the token file to colab, might not work in a different browser than chrome.**

First you must log into Kaggle.com

To get the API token, after you have logged into Kaggle. Go to the top right corner and click the “My Account”.

Afterwards scroll down to the button that says “Create New API Token” – This downloads a file called “Kaggle.json” – Notice the download location, this file has to be uploaded to Colab afterwards.

Email Preferences

☐ Email me news and updates. You can opt-out at any time by unchecking this box, or by clicking the Unsubscribe link at the bottom of emails you receive.

API

Using Kaggle's beta API, you can interact with Competitions and Datasets to download data, make submissions, and more via the command line. [Read the docs](#)

Create New API Token

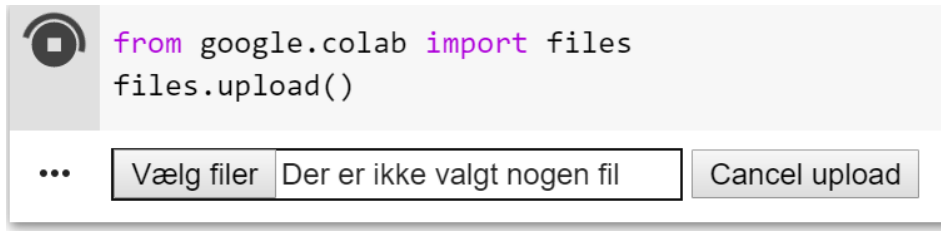

Expire API Token

Quota

Private Datasets	0 B / 20 GB		?
GPU	0 hrs / 30 hrs		?

[Close account...](#)

When the API token is downloaded, go back to colab and press the “Vælg filer” or “Select file” and then select the token

Afterwards the code should run, and the data should be imported correctly
